Welcome to **UMV SERVICES NIGERIA LIMITED**

About Us

OUR VISION

Our Vision is to deliver Operational Excellence in every project we undertake

OUR COMMITMENT

In actualization of our vision, we are committed to;

- Adopting a Standard Operating Procedure
- Ensure the Procedures are consistent with the industry requirement
- Mentor Team & ensure they are competent as standalone
- Measure Teams' performance through competency assessment.
- Evaluate customers' expectation and recommended best approach
- Feedback Survey from customer as a way of continuous improvement

Our Work Procedures/Policies

STANDARD OPERATING PROCEDURE (SOP)

A Standard Operating Procedure, or SOP, is a set of step-by-step instructions compiled by an organization to help workers carry out complex routine operations. SOPs aim to achieve efficiency, quality output and uniformity of performance, while striving to bridge the loopholes in communication dissemination as well as eliminating failures within the services rendered by the organization. Thus, at UMV Services, our operations team have good understanding of SOP and comply fully to the procedures therein, thereby ensuring our services are executed on the premises of this procedures.

CONSISTENT STANDARD PROCEDURES

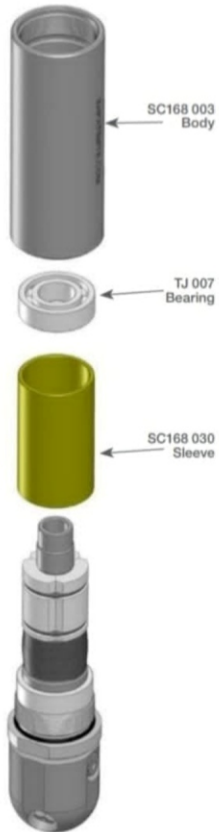

We have a well structured template which ensures same quality standard for all similar job we execute. Some highlights of our work template are;

- All similar Jobs (preparation, execution, maintenance, etc) must follow similar pattern such as Planning, Rig Up, Risk assessment & Mitigation, Function Testing, Execution, House keeping and Demobilization.
- Regular Feedback from customers are obtained, as a guard to a continuous improvement of the services being rendered to them.
- Existing procedure are Reviewed to capture peculiarities of the different field scenarios with safety in view
- Accurate and timely Documentation/Records are taken and made accessible for all teams involved in the project in view.
- etc

Our Mentorship Psychic

Mentorship is a partnership course between two or more people for the purpose of sharing as well as impacting knowledge/technical know-how from the experienced to the less-experienced with respect to specified product line/service. At UMV Services, we give attention to this dynamic method of leaning. The essence is to ensure all operations team are fully competent in rendering flawless service delivery in the safest possible manner. The Advantage of this; is the pool of competent experience Team that make up our organization.

WELLBORE/DOWNHOLE CLEANING SERVICES

Remove Wellbore/downhole Debris And Maintain a Clean and Product-friendly Pathway for Products

We offer professional industrial cleaning services, strengthened by a mechanical, chemical, and filtration-based technologies. Our comprehensive Wellbore/Downhole cleaning services is ensured with modern technological know-how that covers the complete life cycle of any well, removing every debris and residues to leave a clean, solids-free, and completion-ready well. Our experts are poised to leave a clear/clean path for products, thereby helping clients eliminate the obnoxious costs of reoccurring cleaning exercise.

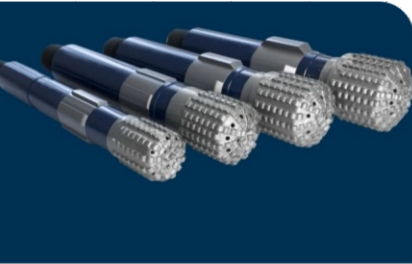

Our comprehensive Wellbore/Downhole Cleaning Services covers; Coiled Tube Cleaning, High Pressure Water Cleaning, Simple Field Maintenance, Jets Replacement, etc

FILTRATION SERVICES

Maintain A Solids-Free Well

Our filtration services provide effective solids removal for your completion, workover, and gravel-pack fluids. This integrated or standalone filtration services remove the bacteria, scale, clay, rust and pipe dope—or other solids—that can reduce production potential and lead to formation damage.

DRILLING CHEMICALS

Increase efficiency and achieve Optimum performance.

Drilling mud composition directly contributes to the condition and life of oil or gas wells. Our Drilling Chemicals includes a wide range of fluid additives for emulsification, oil-wetting, etc. Our high-quality products, as well as our expertise, enable our customers to increase their efficiency and achieve optimum performance.

Via thorough mud analysis, we offer customers industry-leading, independently verified displacement chemicals (such as filter-cake breakers, water-wetting surfactants, oil-base mud thinners, and pipe-dope solvents) to address their unique problems as and at where necessary. Our drilling chemicals solutions provide a smooth and complete transition from drilling to completion fluid.
